Profile

Business Analyst with 3+ years of experience in gathering requirements, streamlining processes, and delivering data-driven solutions. Skilled in SQL, Python, and Excel with a strong background in stakeholder engagement and Agile project delivery. Proven success in implementing HR tech modules and driving client satisfaction through effective testing and change management.

Skills

- **Project Management:** Agile, Scrum, Cross-Functional Collaboration.
- **Documentation & Requirements Management:** BRDs, FRDs, Use Cases & Test Cases.
- **Testing & Validation:** UAT, Regression, Test Plan Development, Issue Resolution.
- **Stakeholder Engagement:** Workshop Facilitation, Change Management, Business Process Mapping.
- **Strategic Analysis:** Requirement Gathering, Gap Analysis, Operational Efficiency Optimization
- **Tools:** SQL, Python, Excel, Visio, PowerPoint, Word, Planner.

Work Experience

Vassar Labs **Sept-Present**

IT Business Analyst

- Leading **KAVACH Performance Analysis** initiatives by driving requirement gathering, functional design, and dashboard workflows across modules including **Events, Root Cause Analysis (RCA), Trip Analytics, Mode Degradation, and System Health Monitoring**.
- Performing **deep log analysis across locomotive and station systems** (Regular, Boot, Crash, Movement Authority, Tag Reads, DMI, VC1/VC2/VC3) to identify operational issues and generate actionable insights for performance monitoring.
- Designed **Trip Start/End logic, Trip Continuity tracking, and Mode Degradation detection (FS → LS/SR/OS)** to enable accurate journey analytics and operational diagnostics.
- Produced **BRDs, FRDs, process flows, test scenarios, and acceptance criteria**, ensuring alignment between **business stakeholders, development, and QA teams**.
- Facilitated **client workshops and stakeholder discussions** with HBL and engineering teams to validate analytics logic, finalize KPIs, and ensure compliance with **RDSO operational requirements**.
- Defined a **Master JSON schema for all KAVACH log types**, enabling standardized backend processing and improving data consistency across analytics modules.
- Partnered with **UI/UX teams to design Figma dashboard prototypes** for Events, RCA, Loco Health, and Station Health monitoring systems.
- Contributed to **Agile sprint planning, backlog refinement, and HPA ticket management**, ensuring smooth coordination between **BA, development, and QA teams**.

TCS **2022-2025**
Business Analyst

- **Collaborated with cross-functional teams** to collect, document, and analyze business requirements, resulting in a project success rate of 95% by ensuring alignment with strategic objectives.
- **Executed collaborative gap analysis** to ensure thorough Functional and Integration testing across diverse application modules and custom components, engaging with cross-functional teams to clarify requirements, ultimately achieving a 20% decrease in design modifications.
- **Authored detailed Business Requirements Documents (BRDs), Functional Requirements Documents (FRDs), and use case scenarios**, functional test cases, and scenario documentation, which contributed to improved project clarity and expedited development timelines by 15%.
- **Facilitated workshops and stakeholder meetings** to effectively gather input, resulting in a 20% increase in Client satisfaction and enhanced project buy-in across various departments.
- **Designed and led the execution of end-to-end test strategies**—including functional, integration, and **UAT** phases—to validate alignment with business requirements, resulting in a 90% reduction in post-deployment issues.
- Led the transformation of **Performance Management, Career Development, Succession Planning, and Collaborative Workspace modules.** Provided post-deployment client support by resolving service **delivery queries, managing incidents, and handling change requests** to ensure smooth operations.
- **Oversaw change management** initiatives, developing training materials and documentation that led to a 100% adoption rate and ensured a seamless transition for users.

Case Studies

- Pizza Runner SQL Case Study
  - Conducted detailed SQL analysis on operational data to identify inefficiencies and improve delivery performance.
  - Designed and executed multiple business queries to derive insights into customer behavior, runner efficiency, and ingredient usage.

- Danny's Diner SQL Case Study
  - Used SQL to extract and analyze sales and loyalty data for a fictional diner.
  - Delivered insights into customer order patterns, frequency, and menu popularity.

- Pizza Hut Analysis
  - Performed SQL-based data exploration and business performance analysis for Pizza Hut.
  - Focused on customer segmentation, product-level sales, and high-level revenue patterns.

Education

- **MBA, HR & Marketing** **2019 to 2021**
  Vignan Institute of Information Technology

- **B.Tech, Manufacturing Engineering** **2014 to 2018**
  National Institute of Foundry and Forge Technology

Projects

WORK LIFE BALANCE & IT'S IMPORTANCE

- Analyzed factors affecting work-life balance, identifying Work from Office (WFO) and Work from Home (WFH) as standout contributors. Investigated the impact of COVID-19 on employee preferences, noting a shift towards WFH over WFO which concludes that the WFH/ Hybrid model is a forward-looking approach for organizational work culture

CONSUMER PERCEPTION ON E-VEHICLES

- Analyzed comprehensive secondary data to draw conclusions on consumer perceptions of e-vehicles.
- Forecasted market trends for e-vehicles and examined the shift in customer preferences towards adopting electric vehicle.
